

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1, 7-9, 11-13, 16-18, 20 and 21, CANCEL claim 19 without prejudice or disclaimer and ADD claims 22-24 in accordance with the following:

1. (currently amended) A product information supply method for supplying a terminal of a user who desires to purchase a product via a network with information about a related product that could be bought together with said product, said method comprising the steps of:

receiving combination information about combinations of products from a terminal of a person who has bought the products, and making registration of said combination information with a database, so that the combination information can be accumulated; and

searching the database in response to inquiry information about the combination information from the terminal of the user to supply the terminal of the user with corresponding combination information extracted from the database on the basis of the inquiry information.

2. (Original) The product information supply method according to claim 1, wherein said inquiry information is a choice signal that indicates a product chosen at the terminal of the user in order to specify a candidate for purchase or place a buy order.

3. (Original) The product information supply method according to claim 1, wherein said inquiry information is sent from the terminal of the user.

4. (Original) The product information supply method according to claim 1, wherein said inquiry information is sent by the terminal of the user via a Web server that provides an online shop that sells the products.

5. (Original) The product information supply method according to claim 1, further comprising a step of storing information concerning a number of times a purchase of the related products have been made on the basis of the corresponding combination information supplied to the terminal of the user.

6. (Original) The product information supply method according to claim 1, wherein:
the corresponding combination information includes information about a link to a Web page that introduces the related products into users; and
the method further comprises ~~a step of~~ storing information concerning a number of times reference has been made to the Web page by the combination information.

7. (currently amended) The product information supply method according to claim 5, further comprising ~~a step of~~ providing the person who has made registration of the combination information with a reward based on the number of times a purchase of the related products have been made on the basis of the combination information registered by said person, or based on the number of times reference has been made to the Web page by the combination information.

8. (currently amended) The product information supply method according to claim 5, further comprising ~~a step of~~ determining priority of supplying the user with the combination information on the basis of the number of times a purchase of the related products have been made on the basis of the combination information, or based on the number of times reference has been made to the Web page by the corresponding combination information.

9. (currently amended) The product information supply method according to claim 5, further comprising a step of providing, from a seller who sells the related products or an operating person who operates the Web site, a managing person who manages the database with a reward based on the number of times a purchase of the related products have been made on the basis of the combination information registered by said person, or based on the number of times reference has been made to the Web page by the combination information.

10. (Original) The product information supply method according to claim 1, wherein the combination information stored in the database is registered by an e-mail or a Web page for making registration.

11. (currently amended) The product information supply method according to claim 1, further comprising ~~the steps of~~:
confirming that a buy order of a related product is placed on the basis of the corresponding combination information extracted from the database and sent to the user; and
sending an e-mail to the user terminal to ask the user to make registration of combination

information to be stored in the database after a predetermined period lapses from confirmation.

12. (currently amended) The product information supply method according to claim 1, further comprising ~~a step of~~ producing marketing information from the combination information, the marketing information being sold to another person or organization.

13. (currently amended) A product information acquiring method for acquiring information about a related product that could be bought together with a product bought by a user who operates a terminal via a network, said method comprising ~~the steps of~~:
sending inquiry information about combination information concerning a combination of the product and the related product to a server that manages a database storing the combination information that has been registered by a person who has bought the product; and
outputting, from the server, corresponding combination information extracted from the database by search of the database based on the inquiry information.

14. (Original) The product information acquiring method according to claim 13, wherein said inquiry information is sent as a choice signal which indicates that a product was chosen at the terminal of the user in order to specify a candidate for purchase or place a buy order.

15. (Original) The product information acquiring method according to claim 13, wherein said inquiry information is sent by the terminal of the user via a Web server that provides an online shop that sells the products; and
said combination information is received by the terminal of the user via a Web server that provides an online shop that sells the products

16. (currently amended) The product information acquiring method according to claim 13, further comprising ~~the steps of~~:
sending to the server a signal that places a buy order of a product on the basis of the combination information extracted from the database;
receiving, from the server, an e-mail that asks to make registration of combination information about said product with the database after a predetermined period elapses from placement of the buy order; and
sending combination information including given items back to the server by an e-mail or access to a Web page for making registration of combination information described in said e-

mail that asks to make registration.

17. (currently amended) The product information acquiring method according to claim 13, further comprising ~~a step of~~ causing the user to receive a reward based on a number of times a purchase of a related product has been made or a number of times reference has been made to a Web page that introduces related products, when reference is made by another user to the combination information that has been registered by said user that purchases at least one of the related products or reference is made to the Web page described in the combination information as link information.

18. (currently amended) A product information registering method for making registration of information about a related product that could be bought together with a product bought by a user who operates a terminal via a network, said method comprising ~~the steps of~~:
entering given items of combination information by the terminal of the user by ~~means of~~ an e-mail or access to a Web page for making registration of combination information; ~~and~~
sending the given items of combination information to a server that manages a database for storing the combination information; and
causing the user to receive a reward based on a number of times a purchase of a related product has been made or a number of times reference has been made to a Web page that introduces related products, when reference is made by another user to the combination information that has been registered by said user that purchases at least one of the related products or reference is made to the Web page described in the combination information as link information.

19. (Cancelled)

20. (currently amended) A computer readable recording medium storing a program for supplying a user who operates a terminal to purchases a product via a network, said program causing a computer to ~~function as~~ perform:
~~a database~~ storing combination information about a product and a related product that could be bought together with said product;
~~registration making means for making registration of~~ registering combination information that has been supplied by a person who has bought the product;
~~information outputting means for searching the database on the basis of inquiry~~
information about the combination from the user and sending corresponding combination

information extracted therefrom to the terminal of the user; and

~~reward storing means~~ for storing a value indicating a reward based on a number of times a purchase of a related product has been made or a number of times reference has been made to a Web page that introduces related products, when reference is made by another user to the combination information that has been registered by said user that purchases at least one of the related products or reference is made to the Web page described in the combination information as link information.

21. (currently amended) A product information supply apparatus supplying a user who operates a terminal to purchases a product via a network, said apparatus comprises:

a database storing combination information about a product and a related product that could be bought together with said product;

registration making ~~means-unit~~ for making registration of combination information that has been supplied by a person who has bought the product;

information outputting ~~means-unit~~ for searching the database on the basis of inquiry information about the combination from the user and sending corresponding combination information extracted therefrom to the terminal of the user; and

reward storing ~~means-unit~~ for storing a value indicating a reward based on a number of times a purchase of a related product has been made or a number of times reference has been made to a Web page that introduces related products, when reference is made by another user to the combination information that has been registered by said user that purchases at least one of the related products or reference is made to the Web page described in the combination information as link information.

22. (new) An apparatus comprising:

a registration unit to register a product combination supplied by a person who has bought the product combination via a network;

an output unit to search for the registered product combination based on inquiries by users; and

a reward unit to store a value indicating a reward for the person, based on a number of purchases of the registered product combination by users who searched for the registered product combination.

23. (new) A method comprising:

registering a product combination supplied by a person who has bought the product combination via a network;

searching for the registered product combination based on inquiries by users; and

rewarding the person, based on a number of purchases of the registered product combination by users who searched for the registered product combination.

24. (new) An apparatus comprising:

registering means for registering a product combination supplied by a person who has bought the product combination via a network;

searching means for searching the registered product combination based on inquiries by users; and

rewarding means for rewarding the person, based on a number of purchases of the registered product combination by users who searched for the registered product combination.
